

ULTRADWARF GREENS PROGRAM

Foliar nutrient and biostimulant program with L-Amino Acids maximize uptake of nutrients resulting in healthier turf, rapid green up, and long-term color response.

Provides optimal nutrition and uniquely balanced biostimulant additions to complement the growth activity of Ultradwarf Bermuda greens.

18-3-4 ZetaPlex N Balanced nutrient package with 18 L-amino acids. Ultimate nutrient absorption provides excellent plant response with low dose applications. Perfect foliar fertilizer analysis for warm season turf.

Rate:
3 to 6 oz
per 1000

Talon Micros Pak Provides key micro-nutrients and a powerful bio-stimulant package. Talon increases overall plant metabolism of warm season turf, allowing it to better recover from constant traffic. Contains Ca, Fe, Mg, Mn, Zn, Cu, and B.

Rate:
1 to 3 oz
per 1000

1-0-15 ZetaPlex K Unsurpassed foliar availability of potassium for proper plant water relations and cell turgor pressure. L-amino acid package allows plant to respond optimally during summer heat, drought, and traffic pressures.

Rate:
3 to 6 oz
per 1000

9-0-0 ZetaPlex Ca Calcium uptake is enhanced with plant derived L-amino package. This combination provides better rooting, cell strength, plant hardiness, carbohydrate conservation, and improved plant respiration.

Rate:
3 oz
per 1000

OPTIONAL PRODUCTS:

Nautico Verde Natural Biostimulant
IronMan Pro 10-0-0 with Fe and Mn

Rate:
1 to 3 oz
per 1000
