

NORTHERN GREENS PROGRAM

Foliar nutrient program with L-amino acids maximizes uptake of nutrients resulting in healthier turf, rapid green up, and long-term color response.

Enhanced Stress Tolerance
Better Rooting

Improved Photosynthesis
Optimal Nutrient Uptake

18-3-4 ZetaPlex N Balanced nutrient package with 18 L-amino acids. Low dose applications result in excellent color and controlled growth response on cool season turf.

Rate:
3 to 6 oz
per 1000

ProVita Stress Management Contains seaweed extract, humic fractions, key micronutrients and surfactant to increase foliar uptake of nutrients. Increases antioxidant production and photosynthesis.

Rate:
2 to 4 oz
per 1000

Liquid Trace Complete micronutrient package utilizing glucose compounds and organic acids for complexing and increasing nutrient uptake. Seaweed extract for improving the plant's defense mechanisms.

Rate:
1 to 3 oz
per 1000

1-0-15 ZetaPlex K Unsurpassed foliar availability of potassium for proper plant water relations and cell turgor pressure. Allows plant to respond optimally during summer heat, drought, and traffic pressures.

Rate:
3 oz
per 1000

OPTIONAL PRODUCTS:

9-0-0 w/ 12% Ca

12-4-6 Bio Based

Rate:
3 oz
per 1000
