

# RECOVERY AND RELIEF

## High Performance Bionutritionals for Problem Turf

When heat, drought, traffic, and other stress conditions are more than your turf can handle, depend on the reliability, performance, and protection of EnP Turf.

**Enhanced Antioxidants**

**Root and Shoot Recovery**

**Lateral Growth**

**Carbohydrate Production**

**ZetaPlex Complete 3-0-0** Contains 18 essential L-amino acids. Allows the plant to build proteins and improve carbohydrate storage. ZetaPlex Complete improves plant metabolism, especially photosynthesis.

**Rate:**  
1 to 3 oz  
per 1000

**Nautico Verde** Concentrated seaweed extract helps to initiate root and shoot formation, increases cell development, improves carbohydrate production and boosts the natural plant defense systems.

**Rate:**  
1.5 to 3 oz  
per 1000

**Talon Micros Pak** Provides important micronutrients and natural plant extracts. Talon will improve plant respiration, photosynthesis and lateral recovery. Contains Ca, Fe, Mg, Mn, Zn, Cu and B.

**Rate:**  
1 to 3 oz  
per 1000

**ProVita** Provides plant extracts geared to improve antioxidant activity important for recovery of leaf and root tissue. ProVita will help drive root recovery after loss or disruption. Surfactant improves crown and root hydration.

**Rate:**  
3 oz  
per 1000
