

SUMMER STRESS PROGRAM

Advanced Foliar Uptake

Advanced Nutrient Availability

Advanced Performance

SUMMER FOLIAR FERTILITY PROGRAM

Provides turf with balanced nutrition, plant extracts, and L-amino acids. This program will help enhance stress tolerance, improve photosynthesis, provide better rooting, and increase overall nutrient uptake.

ZetaPlex Complete 3-0-0 Contains 18 essential L-amino acids. Builds proteins and improves carbohydrate storage. Mn and Mg are enzyme co-factors vital for plant production of proteins. Improves plant metabolism, especially photosynthesis.

Rate:
1 to 2 oz
per 1000

Nautico Verde Concentrated, cold-processed seaweed extract supplies multiple carbon sources for better root development, improved photosynthesis and increased plant antioxidant production.

Rate:
1.5 to 3 oz
per 1000

12-4-6 Balance nutrient package with bio-based nitrogen sources, seaweed extract, and fulvic acids. Results in controlled turfgrass growth and improved response to drought, heat, and traffic stress.

Rate:
3 to 6 oz
per 1000

9-0-0 ZetaPlex Calcium Calcium uptake is enhanced with plant derived L-amino package. This combination provides better rooting, cell strength, plant hardiness, carbohydrate conservation and improved plant respiration.

Rate:
3 oz
per 1000
