

ATHLETIC FIELD PROGRAM

COOL SEASON

Foliar nutrient program with L-amino acids maximizes uptake of nutrients resulting in healthier turf, rapid green up, and long-term color response.

FOLIAR PROGRAM

Apply every 14 to 28 days

18-3-4 ZetaPlex N Balanced nutrient package with 18 L-amino acids. Ultimate nutrient absorption provides excellent plant response with low dose applications. Perfect foliar fertilizer analysis for cool season athletic field turf.

Rate:
3 to 6 oz
per 1000

ProVita 4-0-1 Contains seaweed extract and humic acids for exceptional summer stress benefits and increased photosynthesis. Improves rooting throughout difficult summer conditions. Surfactant works to improve uptake of all foliar nutrients.

Rate:
2 to 4 oz
per 1000

1-0-15 ZetaPlex K Unsurpassed foliar availability of potassium for proper plant water relations and cell turgor pressure. L-amino acid package allows plant to respond optimally during summer heat, drought, and traffic pressures.

Rate:
3 to 6 oz
per 1000

ZetaPlex Iron Highly available source of iron and manganese sequestered with citric acid. Provides striking color response and longevity. Combination of urea and natural surfactant improve uptake and utilization of growth regulators.

Rate:
1.5 to 3 oz
per 1000

SOIL PROGRAM

Apply once a month

Nano Cal Carbon encapsulation of calcium ensures rapid delivery to roots. Calcium helps reduce sodium build up in soils.

Rate:
1.5 to 3 oz
per 1000

Soil Support Natural biological extracts stimulate growth of beneficial microbes. Improves soil life, increases mineralization of soil nutrients and utilization of fertilizers.

Rate:
3 oz
per 1000
